SUMMARY

Enthusiastic developer skilled in modern web technologies, aiming to leverage experience in creating scalable applications for impactful solutions. Passionate about building efficient software solutions and continuously learning new technologies.

PROJECTS

Custom Tech Lab — Full-Stack IT Solutions Platform [\[Live Site\]](#) [\[Site GitHub\]](#) [\[DashBoard\]](#) [\[Dashboard GitHub\]](#)

- Built a full-stack IT solutions platform with a public website and admin dashboard for managing company content.
- Developed RESTful APIs with Hono, MongoDB, and Mongoose for data management and backend operations.
- Designed and deployed separate frontend, admin, and backend applications using Vercel.

Code Reviewer (AI Agent) [\[Live Site\]](#) [\[GitHub\]](#)

- Implemented an autonomous code-review agent using LLM tool calling and Zod-validated feedback units.
- Built an interactive interface for reviewing and improving code snippets based on user requirements.
- Integrated multiple AI models through Vercel AI SDK for automated code analysis and feedback.

My Portfolio Website [\[Live Site\]](#) [\[GitHub\]](#)

- Architected a high-performance personal portfolio using SvelteKit, TypeScript, and Tailwind CSS.
- Implemented schema validation with Zod and automated communication using Resend.
- Deployed the application on Cloudflare infrastructure.
